

Knowledge Power

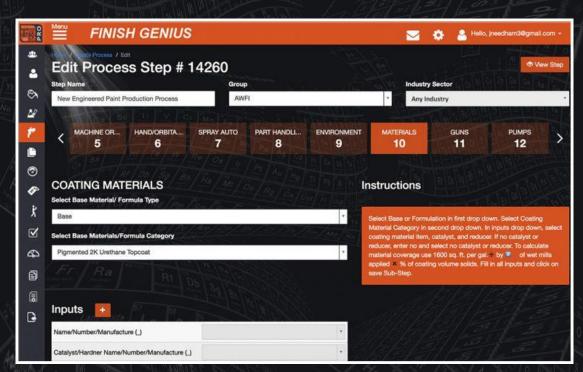

- □ Average Finish Process Consist of Between 100-145 Data Points
- ☐ Average Finish Process Use 8-10 Steps and Between 25-30 Sub-Steps
- ☐ 78% of Finisher's Human Resources are Spent on Process Metrics
- 22% of Finisher's Human Resources are Directly Related to Dexterity and Technique

Finishing By Numbers versus: Tribal Knowledge

Process Configuration Automation

- Connecting the right coating technology with....
- ☐ The right Equipment technology =
- Best Process for the job

Finishing By Numbers - White Wood Orbital Sanding Process Metrics

Causes of Orbital Scratch Defects

- □ Wrong Grit
- □ Damaged Paper
- ☐ Surface Moisture High
- □ Wrong Orbit Size
- Poor Compressed Air Flow
- □ Wrong Technique
- ☐ Wrong Abrasive
- ☐ Sander Maintenance
