Lean-Six Black Belt Boot Camp

- A **Yellow Belt** has a working knowledge of Lean Six Problem Solving Tools.
- A **Green Belt** has experience using, DMAIC and Lean Principles and Tools.
- A **Black Belt** has the expert knowledge & skills to lead Lean-Six Projects.

This Lean-Six course prepares participants for the role of a Lean-Six Practitioner. This training will enable you to achieve, sustain and maximize business success.

This workshop is a comprehensive training covering systems, principles, strategies and technics within Lean-Six Methodology.

Lean-Six relies on a collaborative team effort to improve performance by systematically removing waste and reducing variation. It combines lean principles, strategies and techniques to identify and eliminate the eight kinds of waste.

We will be teaching theory, supplemented with real-world workable examples in every section with improvement events so you can immediately apply what you have learned to your work environment.

Lean-Six is driven by a close understanding of customer needs, using facts, data, Value Stream Analysis, and Lean Daily Management to improve and reinvent your business processes.
