2018 ROTAS™ Stabilizing System

2018 ROTAS™ Stabilizing System

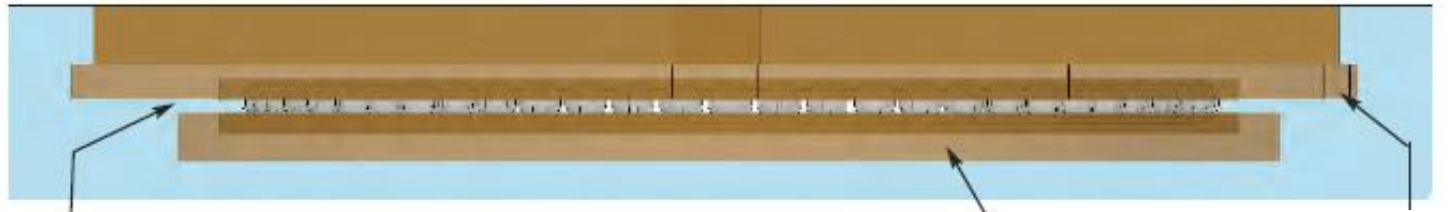

2018 ROTAS™ Stabilizing System

NEW Anti-Tip,
Anti-Pinch Design

The backer board shown in this photo is also a component of the ROTAS Stabilizing System.

Sandwiching the ROTAS between the bottom tier of the storage unit and the Stabilizing Dock conceals the ROTAS almost completely.

Bottom Stabilizing Dock

The bottom tier of the unit must be routed on its underside so as to sandwich the ROTAS rings and balls securely between the bottom tier and the Stabilizing Dock.

ROTAS™
A new spin on storage
