# Exhibit Guidelines & Regulations

**Standard Booth DEFINITION:** Exhibit consisting of one or more standard units in a straight line.

## HEIGHT

Exhibit fixtures, components and identification signs will be permitted to a maximum height of 8'3" (2.5m).

**INTENT**—If a portion of an exhibit booth extends above 8'3" (2.5m) high, the exhibit booth background will detract from the overall impact of the exhibit directly behind that booth regardless of how the rear of the offending exhibit is finished.

## DEPTH

All display fixtures over 4'0" (1.22m) in height and placed within 10 lineal feet (3.05m) of an adjoining exhibit, must be confined to that area of the exhibitor's space which is at least 5'0" (1.52m) from the aisle line for those exhibits with 10'0" (3.05m) depth or more.

**INTENT**—Each exhibitor is entitled to a reasonable sight line from the aisle regardless of the size of exhibit. Exhibitors with larger space—30 lineal feet (9.14m) or more—should also be able to effectively use as much of the total floor space as possible as long as they do not interfere with the rights of others. The limitation on display fixtures over 4'0" (1.22m) and within 10 lineal feet (3.05m) of a neighboring exhibit is intended to accomplish both of these aims.

## IMPORTANT

Space dimensions shown on floor plan are from center line of booth equipment, such as side rails and/or back drape. Exhibit structures must be constructed to allow sufficient tolerance on each side for this equipment and for utility service at rear of booth.

Display fixtures over 4' (1.22m) must be confined to that area of the booth that is at least 5' (1.52m) from the aisle line.

# Perimeter Booth **DEFINITION:** Standard booth located on the outer perimeter aisle of the exhibit floor.

## **HEIGHT**

Exhibit fixtures, components and identification signs will be permitted to a maximum height of 12'0" (3.6m).

**INTENT**—If a portion of an exhibit booth extends above 12'0" (3.6m) high, the exhibit booth background will detract from the overall impact of the exhibit directly behind that booth regardless of how the rear of the offending exhibit is finished.

## **DEPTH**

All display fixtures over 4'0" (1.22m) in height and placed within 10 lineal feet (3.05m) of an adjoining exhibit, must be confined to that area of the exhibitor's space which is at least 5'0" (1.52m) from the aisle line for those exhibits with 10'0" (3.05m) depth or more.

**INTENT**—Each exhibitor is entitled to a reasonable sight line from the aisle regardless of the size of exhibit. Exhibitors with larger space—30 lineal feet (9.14m) or more—should also be able to effectively use as much of the total floor space as possible as long as they do not interfere with the rights of others. The limitation on display fixtures over 4'0" (1.22m) and within 10 lineal feet (3.05m) of a neighboring exhibit is intended to accomplish both of these aims.

## **IMPORTANT**

Space dimensions shown on floor plan are from center line of booth equipment, such as side rails and/or back drape. Exhibit structures must be constructed to allow sufficient tolerance on each side for this equipment and for utility service at rear of booth.

Display fixtures over 4' (1.22m) must be confined to that area of the booth that is at least 5' (1.52m) from the aisle line.

# Peninsula Booth **DEFINITION:** An exhibit, of at least 15'0" x 20'0" (4.572m x 6.09m).

## **HEIGHT**

Exhibit fixtures, components, and identification signs will be permitted to a maximum height of 22'6" (6.86m).

**INTENT**—*The extra height is often needed to permit the open walk-through approach normally used in this type of location. The 22'6" (6.86m) height limitation has been set to avoid undue competition between exhibitors to see who can go the highest or be seen the farthest with each negating the others' efforts. Also, the 22'6" (6.86m) high exhibit will fit into almost any exposition center, thus permitting each exhibitor to get maximum use of his or her exhibit.*

## **DEPTH**

Full use of the floor plan is permitted. However, do not place heavy booth material on the fiber near the edge of your booth. To avoid damage to the network fiber taped to the exhibit hall floor, point-loads must not be positioned within 18" (0.46m) inside the booth boundary along all aisle ways.

## **STRUCTURAL INTEGRITY**

All multi-story exhibits, regardless of whether people will occupy the upper area or not, and all exhibit fixtures and components exceeding 22'6" (6.86m) in height must have drawings available for inspection by Exhibition Management; the installation and dismantling contractor; and the exhibitor and governmental authority during the time the exhibit is being erected, exhibited and dismantled at the show site that include a signature or stamp of a reviewing structural engineer indicating that the structure design is properly engineered for its proposed use, and a signature of an authorized official of the exhibit building company indicating that the structure is built in compliance with the details and specifications set forth on the drawings. Signs must also be posted indicating the maximum number of people the structure will accommodate.

**INTENT**—*Exhibitors in the vicinity of peninsula exhibits are entitled to the same reasonable safety precautions they would expect if they were adjacent to a standard booth.*

## **IMPORTANT**

Exhibitors are cautioned when installing a display with a ceiling or second level to check with the convention center to ensure that their display meets with the necessary fire safety precautions involving smoke alarms, fire extinguishers, sprinkler systems, etc.

# Island Booth **DEFINITION:** An exhibit, of at least 15'0" x 20'0" (4.572m x 6.09m), with aisles on all four sides.

## **HEIGHT**

Exhibit fixtures, components and identification signs will be permitted to a maximum height of 22'6" (6.86m).

**INTENT**—When an island booth exceeds 8'3" (2.5m), it does not interfere with other exhibitors because it obviously does not back up against another exhibitor's back wall. The extra height is often required in an island booth exhibit to permit the open walk-through approach normally used in this type of location. The 22'6" (6.86m) maximum height limitation has been set to avoid undue competition between exhibitors to see who can go the highest or be seen the farthest with each negating the other's efforts. Also, the 22'6" (6.86m) high exhibit will fit into most exposition centers, thus permitting each exhibitor to get the maximum use of his or her exhibit.

## **DEPTH**

Full use of the floor plan is permitted. However, do not place heavy booth material on the fiber near the edge of your booth. To avoid damage to the network fiber taped to the exhibit hall floor, point-loads must not be positioned within 18" (0.46m) inside the booth boundary along all aisle ways.

## **STRUCTURAL INTEGRITY**

All multi-story exhibits, regardless of whether people will occupy the upper area or not, and all exhibit fixtures and components exceeding 12'0" (3.66m) in height must have drawings available for inspection by exposition management, the installation and dismantling contractor, the exhibitor and governmental authority during the time the exhibit is being erected, exhibited and dismantled at the show site that include a signature or stamp of a reviewing structural engineer indicating that the structure design is properly engineered for its proposed use, and a signature of an authorized official of the exhibit building company indicating that the structure is built in compliance with the details and specifications set forth on the drawings. Signs must also be posted indicating the maximum number of people the structure will accommodate.

**INTENT**—Exhibitors in the vicinity of island exhibits are entitled to the same reasonable safety precautions they would expect if they were adjacent to a standard booth.

## **IMPORTANT**

Exhibitors are cautioned when installing a display with a ceiling or second level to check with the convention center to ensure that their display meets with the necessary fire safety precautions involving smoke alarms, fire extinguishers, sprinkler systems, etc.

# Canopies and Ceilings **DEFINITION:** Exhibit component supported over an exhibitor's space for decorative purposes

## **HEIGHT**

Canopies, false ceilings and umbrellas will be permitted to a height that corresponds to the height regulation for the appropriate exhibit configuration of which they are a part. For example, canopies will not exceed 8'3" (2.5m) in height in a standard booth configuration. Furthermore, the canopy or false ceiling will not exceed 1'0" (30cm) in depth and cannot be used for identification or display purposes.

**INTENT**—Exhibitors requiring canopies or false ceilings to create the desired exhibit environment within their booth space should be allowed to do so as long as the canopy and its support structure does not violate the intent of the height or depth regulation.

## **DEPTH**

Canopies may extend out to the aisle line and up to the booth line on either side of an exhibitor's space providing that the support structure will not exceed 3" (7.62cm) in width when placed within 10 lineal feet (3.05m) of an adjoining exhibit and not confined to the area of the exhibitor's space which is at least 5'0" (1.52m) from the aisle line. Furthermore, canopies, false ceilings or umbrellas will not be used for identification or display purposes except as would normally be allowed for any exhibit component within the regulations set forth for the exhibit configuration.

**INTENT**—Exhibitors adjoining exhibits with canopies are entitled to the same reasonable sight line from the aisle as they would expect if they were adjacent to an exhibitor with a standard booth.

## **IMPORTANT**

Exhibitors are cautioned when installing a display with a ceiling or second level to check with the convention center to ensure that their display meets with the necessary fire safety precautions involving smoke alarms, fire extinguishers, sprinkler systems, etc.

Do not place heavy booth material on the fiber near the edge of your booth. To avoid damage to the network fiber taped to the exhibit hall floor, point-loads must not be positioned within 18" (0.46m) inside the booth boundary along all aisle ways.
